Source: Population Distribution Branch U.S. Bureau of the Census Release date: Sept. 1995 All data are consistent with the intercensal estimates shown in Table 2 of CURRENT POPULATION REPORTS Series, P25-1106. Note1: The "residual" shown here includes the components of population change: net international migration, Federal Citizen movement, net domestic migration, and a statistical residual. For post-1990 estimates, the estimates methodology was refined to allow separate identification of these components. For state population estimates for the 1980s decade, only the components of births, deaths and "residual" are available. Note2: The 1990 census counts used in this intercensal series do not include count resolution corrections.
